Objective

Results-driven Senior Mobile Engineer with 5+ years of experience building high-performance, scalable iOS and Flutter applications. Proven expertise in SwiftUI, UIKit, MVVM architecture, and clean code principles. Specialized in government and enterprise mobile solutions, successfully delivering applications to millions of users across the Saudi Arabia region. Strong technical foundation with a track record of mentoring junior developers and driving best practices adoption across teams.

Experience

Sure international Technology

07/2021 – Present
Saudi Arabia

Mobile Engineer

Led development of mission-critical government mobile applications serving Saudi Arabian government agencies. Architected scalable solutions using modern iOS frameworks and best practices.

DGA (Digital Government Authority) – Native iOS App

Developed a comprehensive government services application enabling thousands of government employees to complete critical tasks efficiently. Implemented declarative UI using SwiftUI with robust MVVM architecture ensuring seamless state management and reactive data streams. Established comprehensive testing protocols in collaboration with QA teams, achieving high code coverage and production reliability.

MyMT (Ministry of Tourism) – Native iOS App

Engineered employee task management application for the Saudi Arabian Ministry of Tourism. Implemented advanced features including HealthKit integration and digital card functionality with Apple Wallet support. Architected using Clean Architecture pattern with distinct Data, Presentation, and Domain layers.

SCISP (Science Information Sharing Platform) – Native iOS App

Built informational application for Saudi government to disseminate critical information. Implemented features using SwiftUI and MVVM architecture with reactive state management ensuring optimal performance and responsiveness.

ZATCA (Zakat Conference) – Native iOS App

Developed comprehensive conference management application for the Saudi Zakat Tax and Customs Authority. Features include lecture scheduling, article reading, news aggregation, and direct speaker communication functionality.

TGA Taxi & TGA Driver – Flutter Applications

Built full-featured ride-hailing ecosystem mirroring Uber functionality. Implemented real-time communication with multi-language support and dynamic ride management. Developed both user and driver-facing applications with seamless integration.

Bazzary

04/2025 – 04/2026

Software Engineer (Part Time)

Bazzary (Super App-E-commerce & Delivery Platform):

- Migration of iOS codebase from UIKit to SwiftUI, improving code maintainability and reducing technical debt. Developed features across e-commerce, delivery, and digital payment platforms serving millions of users in the Yemen region.

Key achievements:

- Bazzary Shop Local shopping platform connecting users with nearby stores.
- Bazzary Mart - Dally essentials delivery with quick turnaround.
- Bazzary Global - International products marketplace.
- Buy Now, Pay Later (BNPL) - Flexible payment solutions.

Sprints

12/2022 – 12/2023

IOS Reviewer & Instructor

Maadi

Instructed iOS development module (App Production) to bootcamp students, focusing on Xcode and App Store Connect deployment. Conducted comprehensive code reviews across all bootcamp modules, maintaining high coding standards and mentoring junior developers.

Awarmmer Elshabaka

12/2020 – 07/2021

Mid iOS Developer

I was part of the software house team. I worked on varicus projects involving software development, testing and maintenance

- Achievements:
- Created multiple software house applications, including:
Cafe Station, Bubbles Laundry إستئجار مزاد KSA

ELMnassa

08/2019 – 11/2020

Internship & Junior iOS Developer

I was part of the software house team. I worked on various projects involving software development, testing and maintenance

- Achievements:
- Created multiple software house applications, Including:
Hire App, Turkish bazar App

Education

degree of computer & information science

2016 – 2020

Mansoura University

- Major: Computer science.
- Cumulative grade: Very good.
- Graduation project grade: Excellent.

Skills

Technical Skills

- **Programming & Frameworks:**Swift (SwiftUI, UIKit), Dart (Flutter), PHP (Laravel)
- **Architecture & Patterns:**MVVM, MVP, TCA, Clean Architecture
- **Mobile Development Tools:**Alamofire, Firebase, FCM, Push Notifications, Google Maps, MapKit, Agora (basic)
- **State Management:**BLoC (Flutter)
- **Data & Storage:**SwiftData, Realm, Offline Data Management
- **Version Control & CI/CD:**Git (GitHub, GitLab), CI/CD (Fastlane)
- **Dependency Management:**CocoaPods, Swift Package Manager (SPM)

Soft

- Teamwork
- Presentation
- Collaborating
- Supervision
- Communication skills
- Respectful
- Consistency

Languages

- Arabic (Native).
- English (working proficiency).

Achievements

ECPC 2018 Qualifications

Vodafone's innovation Hackathon

Round 37th Place Recycle app Project.

Problem Solving Competition.

My App Listed as one of top ten projects among 230 ideas.

Volunteer Experience

I worked as a volunteer developing Flutter and IOS apps, and I assisted students in learning the basic of programming

Worked as a volunteer developing Flutter apps, and successfully published apps on the App Store, including:
